TO: ALL LUCAS COUNTY PARAMEDICS

FROM: Brent Parquette, NREMT-P
LCEMS Continuing Education Program

RE: **October CE 2011**

The month of October will be dedicated to a review of the cardiovascular emergencies listed below:

- Cardiogenic Pulmonary Edema
- Cardiogenic Shock
- NeuroCardiogenic Syncope
- STEMI / NSTEMI / USA

Skill stations will once again be used to reinforce any topic material reviewed during the lecture period. There has been some recent confusion regarding field access of CVADs, and the proper sequence for capturing qualifying signatures within the ePCR. Both of these topics will also be covered during skill station performance. I ask that you review the following LCEMS protocols to help better prepare for class:

Tab 500: Medical Procedures / Equipment

- Section MM: Venous Access – Alternative Routes

Tab 800: Cardiac Protocols

- Section E: Cardiogenic Shock
- Section K: Pulmonary Edema

I look forward to seeing you in the coming month. If you have any questions or comments please do not hesitate to call or e-mail.
