**RE: Continuing Education Classes – October 2015**

---

During the month of October we will once again review our approach to “Trauma Care.” We will review the trauma triage guidelines under which we operate and the important GCS scoring component of trauma assessment. Skill stations, as in the past, will emphasize “hands-on” training with assessment, triage, treatment and transport of the trauma patient.

Please take time to review your trauma assessment and treatment protocols before coming to class to help better prepare you. With TXA (Tranexamic Acid) administration being new to our system in the care of critical trauma patients, time will be spent in review of medication indications and use in the field.

October will be your last month of training in 2015. That being said, look for the new 2016 training calendar to be posted to the website sometime in the month of November.

As always, if you have any questions or comments please feel free to contact me. I look forward to seeing all of you in the month of October.
